

# Transportation and Advanced Technology: Pilot Program (221)

Course Type	Course Code	Course Title	Course Description	Post Secondary Connection
Capstone Course I	IS811	Intro to the Clean Air Car	The California Clean Air Care Course (CACC) is a major component and prerequisite for obtaining a California Smog Technician license. It is a rigorous 68 hour course designed to cover Smog Check inspection procedures for the Basic, and Change of Ownership Smog Check Inspection program areas of the State. In addition, the course covers On-Board Diagnostic II (OBDII) system theory and operation and advanced scan tool diagnostics. This introductory course is designed to prepare learners for challenges presented by this course. Learners will develop familiarity with the California Smog program. They will learn about important key automotive equipment, emission control systems and develop diagnostic skills essential for success in this industry.
